

GREY MATTER FOR A GREEN ECONOMY

Écotech Québec is the first organization of its kind in Canada. To foster sustainable development, it mobilizes actors in the green economy to create the most conducive conditions for business growth and development. It also encourages end-users to adopt more clean technologies.

EXPECTED RESULT

Firmly establish Québec's position in a global green economy

Certification granted by the European Secretariat for Cluster Analysis :

Écotech Québec is the first cleantech cluster in North America to receive this certification of Cluster Management Excellence, and the second in North and South America.

A major player

A partner of sector-based associations

A facilitator of business meetings

The Quebec reference in clean technology

An organization recognized here and abroad

A player with a real impact on the sector

A recognized representative

A catalyst
